

I appose HR 4026.

These stations help us avoid road hazards, and can help save lives, money, and some stress levels by leading us out of storms and keeping us off the roads jam packed with lookie-lou's and begrudging traffic.

Why on earth would you even CONSIDER banning weather and traffic stations? It's not like they swear, or break out in a meteological orgy round the clock or something; someone fell off their rocker when they proposed this one.

Man I tell you, when did this country start filling up with a bunch of do-nothing, irresponsible, anti-progressionlists?
